Ups and Downs

There are wonderful aspects to being a leader, there are also some tough things. In pairs try to identify as many as you can and list them on the chart here. Think widely and be as wacky as you like.

You may like to reflect on:

- How many of these things are part of being a leader and how many are rooted in being a disciple?
- Which of these is specific to leadership in a Christian context, and which are common to any type of leadership role?

For Journalling/Mentor

- What are the 'sufferings' I struggle with most? Why?
- What can I do to help myself deal well with these things?
- How can I develop others in leadership in a way that helps them understand the costs involved?
